

Hello

With regard to our recent conversation regarding the poor condition of the Stockport section of the Middlewood Way.

I speak on behalf of our walking club, 'Stockport Walkers' which is a long established club having 175 members. We are split into three category's of walkers and hold five organised walks each week throughout the year.

The Middlewood way is used quite frequently in our walks especially in the winter period when we do not want to travel far afield. Unfortunately the winter period means inclement weather and muddy conditions.

We are aware that quite a few areas of this section are in a bad state of repair, when compared with the sections maintained by Cheshire County Council.

We would therefore fully support your campaign for work to be undertaken to bring the Middlewood Way up to an acceptable standard of repair.

The Stockport section of the Middlewood Way is well used by walkers and cyclists, especially families with young children and I know from first hand experience how bad some areas have been churned up and not in a condition which is fit for purpose.
